2) Cultural references and necessary background to have a better grasp of the theme under study :

- Abortion tourism is a phrase used to refer to the fact that people living in countries where abortion is illegal or strictly limited often travel to a neighboring country if they need one. In the US, abortion is one of the main culture wars which are being fought between conservatives (traditionalists) and progressives (liberals): **pro-life vs pro-choice**. The abortion was legalized in the US in 1973 (**Roe vs Wade**) and in France in 1975.
Cf fiche 9 UK + fiche 11 US livre civi (Religion)
- On Thursday June 26th, 2008, five of the nine justices (on the Supreme Court) ruled that the right to bear arms is an individual right. *The National Rifle Association of America* (or **NRA**) is an organization whose goal is the promotion of gun ownership in the United States. (News: **Columbine** is the name of the high school in Colorado where two students killed 12 other students and one teacher, injuring another 23 people, before committing suicide.) **cf fiche 7 UK et fiche 12 livre civi (Justice, Law and Order)**
- the fight against criminality and urban violence in the United States and in Great Britain: In the USA, city centers, abandoned by affluent classes, becomes the ground of the crime. Thanks to Rudy Giuliani (The former Mayor), New York found its tranquility thanks to a “zero tolerance” policy, to an improvement of the efficiency of the police, to measures in favor of employment and of social assistance. The British Home Minister took measures to favor the presence of **security cameras** in all the public places. Since 1993, violent crimes (murder, rape, robbery and aggravated assault) have steadily declined while the number of people behind bars has increased to close to 7 millions. The development of **closed circuit television (CCTV)** has proved highly effective. Most British towns and cities have moved to CCTV surveillance of public areas, housing estates, car parks, public transport and facilities; about 5 million cameras now exist.
London riots in 2011 cf Unit17 (Surveillance)
- The death penalty in the United States and in Great Britain: In **England**, Parliament adopted the European Convention on Human Rights which **forbids the death penalty**. On the contrary, in the USA, **38 states and the federal authority have the death penalty**. Sometimes, the judges reduced the charges to avoid capital punishment. In 1999 and 2003, the Commons ratified the European Convention on Human Rights abolishing the death penalty. In 1994, President Clinton signed the Violent Crime Control and Law

Enforcement Act, expanding the federal death penalty to some 60 crimes. Public support for death penalty has always fluctuated.
